

Mobile G-Volution Experience

TIME

Smart.
Fast.
Imagine...

4G

The telecommunications company of firsts is doing it again.

BroadBand Significance *[what you already know]*

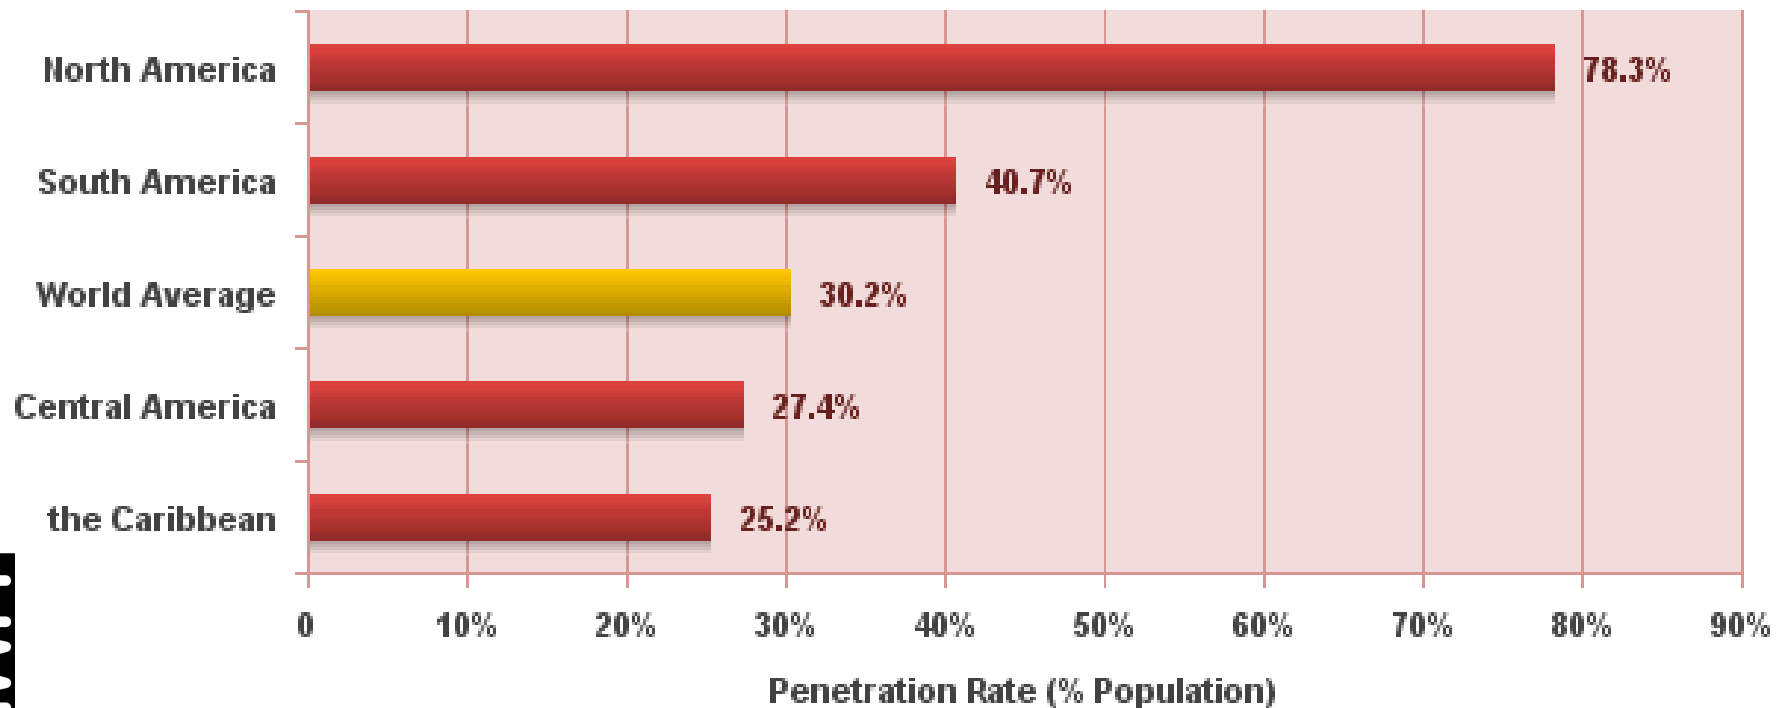

- 10%↑ in Broadband = 1.4% ↑ in GDP*
- Places with high levels of resources and skilled labor, but with lower levels of ICT have fewer 'productive enterprises' and are thus poorer.
- ***Conclusion: A good telecom infrastructure is not only the outcome of economic growth, but is also an input to growth.*****

Fixed Infrastructure has Limitations

Fixed

- Fixed Infrastructure has Limitations
 - Ideal for Broadband Connectivity
 - But has its challenges

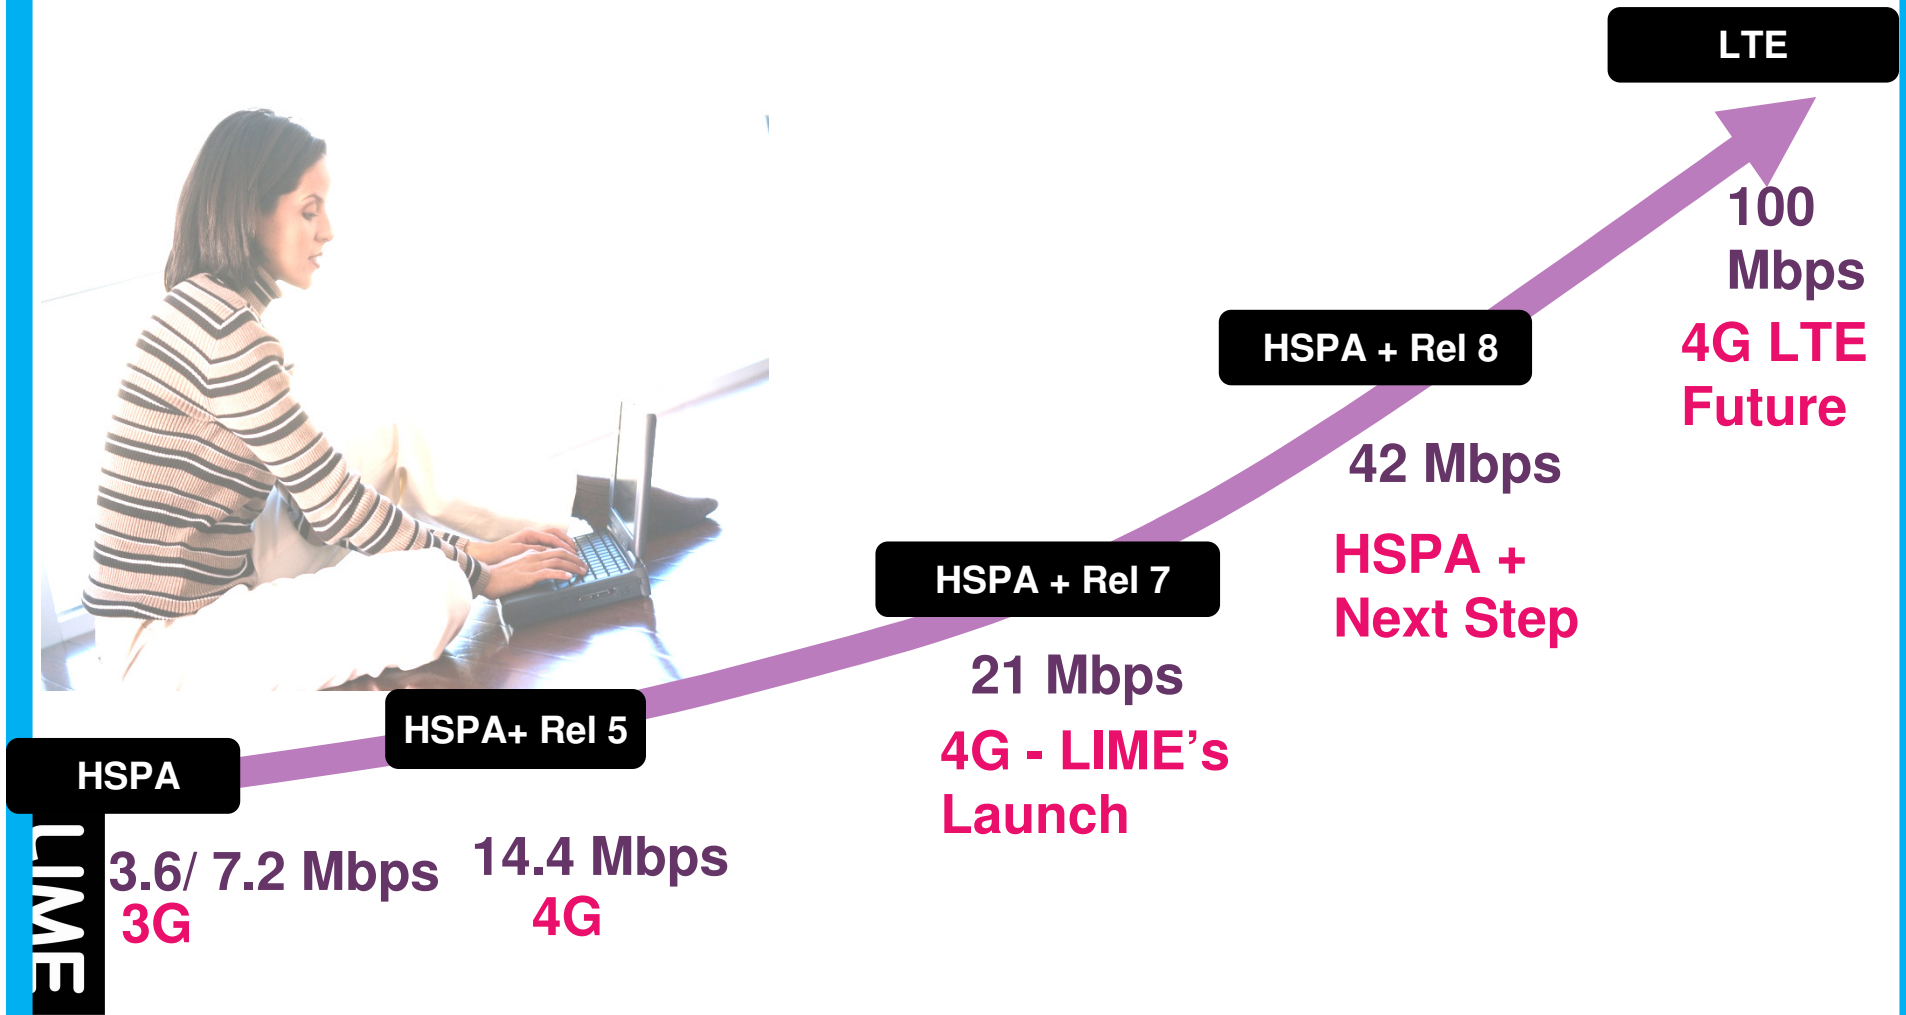

Mobile

- Exponential Growth
 - High Penetration
 - Becomes part of the “go to” strategy for increasing penetration

LIME

Mobile Broadband offers a solution to reach challenged areas, and connect people while on-the-go

Mobile Industry Data Evolution

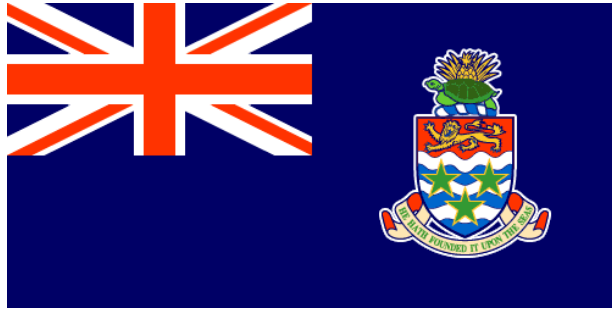

LIME
